

AVISCERA BIOSCIENCE

Anti Human Visinin Like Protein 1 (VLP1) Monoclonal IgG

Preparation

This antibody was produced from a hybridoma resulting from the fusion of a mouse myeloma with B cells obtained from a mouse immunized with purified recombinant VLP1. That antibody was purified by Protein G affinity.

Formulation

100 μg of Mouse anti Human VLP1 Monoclonal Antibody in 100 μl of PBS lyophilized form.

Reconstitution and Storage

Add 100 μ l deionized water to the vial to prepare a antibody stocking solution (100 μ g/ml). Stores it at 4°C for a few days. For long term storage, the reconstituted antibody can also be aliquotted (by 10 μ L per vial) and stored frozen at -20° C to -70° C in a manual defrost freezer for 12 months without detectable loss of activity. Avoid repeated freeze-thaw cycles.

Specificity

This antibody has been selected for its ability to recognize recombinant Human VLP1 indirect ELISAs.

Applications

Indirect ELISA - This antibody can be used at 1:8000 (0.125 $\mu g/ml$) to detect Human VLP1 on indirectly ELISA.

ELISA Assay - This antibody can be used as a capture antibody in a human VLP1 sandwich immunoassay in combination with the Human VLP1 detection antibody (Code No.: A00391-01-50B) and recombinant Human VLP1 (Code No.: 00391-01-100) as the standard. The suggested concentration range for this capture antibody is 2 μ g/mL and should be titrated to determine the optimal concentration.

Optimal dilutions should be determined by each laboratory for each application.

Product Information

Code A00391-02-100

Name Human VLP1

Mab

Clone No. 2E6D11E12

Lot No.

Size 100 μg

Species Human

Host Mouse

Immunogen Human VLP1

rec.

Ab Type IgG

Purification Protein G

Lyophilized

Formulation Form without

preservatives

Carry Free

Storage -20 ° C

Specificity Human

Reconstitution 100 μ l

Application ELISA
