

Anti Rat Fetuin A (AHSG) Monoclonal Antibody

Product Information

Code	A00173-14-100
Name	Anti Rat Fetuin A MAB
Clone No.	B11A3
Lot No.	
Size	100 µg
Species	Rat
Host	Mouse
Immunogen	Rat Fetuin A Rec
Ab Type	IgG
Purification	Protein G
Formulation	lyophilized Form without preservatives free
Carry	
Storage	-20 ° C
Specificity	Rat
Reconstitution	200 µl
Application	ELISA, WB

Preparation

This antibody was produced from a hybridoma resulting from the fusion of a mouse myeloma with B cells obtained from a mouse immunized with purified recombinant rat Fetuin A. This antibody was purified by Protein G affinity.

Formulation

100 µg of Anti Rat Fetuin A Monoclonal antibody in 100 µl of PBS lyophilized form.

Reconstitution and Storage

Add 200 µl of deionized water to the vial to prepare antibody stock solution at 500 µg /ml. Stores it at 4°C for a few days. For long term storage, the reconstituted antibody can also be aliquotted (by 10 µL per vial) and stored frozen at -20° C to -70° C in a manual defrost freezer for 12 months without detectable loss of activity. Avoid repeated freeze-thaw cycles.

Specificity

This antibody has been selected for its ability to recognize recombinant rat fetuin A on indirect ELISA and western blot.

Applications

Indirect ELISA - This antibody can be used at 0.25 µg/ml to detect recombinant rat fetuin A on indirect ELISA.

ELISA - This antibody biotinylated can be used as detection antibody at 1-2 µg/ml combines with capture antibody A00147-15-100 to detect recombinant rat Fetuin A on ELISA.

Western Blot- This antibody can be used as primary antibody at 1-2 µg/ml combines with secondary antibody to detect Fetuin A on rat tissue homogenates under reduce condition on western blot.

Optimal dilutions should be determined by each laboratory for each application.
