

Rabbit Anti-Human Glia Maturation Factor Gamma (GMF-G) IgG

Product Information

Code	A00676-01-100
Name	Human GMF-G Pab
Clone No.	N/A
Lot No.	
Size	100 µg
Species	Human
Host	Rabbit
Immunogen	GMF-G (H) rec.
Ab Type	IgG
Purification	Protein A
Formulation	lyophilized Form without preservatives free
Carry	
Storage	-20 ° C
Specificity	Human
Reconstitution	PBS, 100 µl
Application	IHC ELISA

Preparation

This antibody was produced from a rabbit immunized with purified, E. coli - derived, recombinant human GMF-G. That IgG was purified by Protein A affinity.

Formulation

100 µg of purified IgG in PBS without preservatives was lyophilized.

Reconstitution

Add 100 µl of PBS to the vial to prepare antibody stock solution at 100 µg/100 µl. Store reconstituted antibody at 2 to 8 ° C for up a few weeks. This antibody can also be aliquotted (by 10 uL per vial) and stored frozen at -20° C to -70° C in a **manual defrost freezer** for up six months without detectable loss of activity.

Storage

Lyophilized antibody can be stored at 2 ~8 ° C for a few weeks or at -20 ° C for six months. **Avoid repeated freeze-thaw cycles.**

Specificity

This antibody has been selected for its ability to recognize human GMF-G in direct ELISAs as well as immunohistochemistry.

Applications

Direct ELISA - This antibody can be used at 1: 5000 (0.2 µg /mL) with the appropriate secondary reagents to detect human GMF-G.

Immunohistochemistry-That Antibody can be used at 1: 500 (2 µg /mL) with the appropriate secondary antibody to detect GMF-G in human heart tissues (ABC).

Optimal dilutions should be determined by each laboratory for each application.
